

MUNIQUIP, LLC

Your Source For Water & Wastewater Equipment

2024 PRODUCT LINECARD

GRUNDFOS

GRUNDFOS SUBMERSIBLE WASTEWATER PUMPS – Premium line of heavy-duty submersible or dry-pit mounted solids handling wastewater pumps from 1.5 HP to 700 HP, various impeller options for world class hydraulic efficiency and maximum solids passage, IE3 premium efficient motors, various mounting configurations including fast-out guide rail systems & complete packaged lift stations available. Grundfos KPL submersible axial-flow propeller pumps.

GRUNDFOS DOSING - DDA SMART digital dosing chemical metering pumps utilizing a brushless DC stepper motor for precision dosing control and industry leading turn down, mechanically & hydraulically actuated chemical metering pumps. Tank mounted, or skid mounted chemical metering pump systems & accessories. DID digital skid mounted analyzers, reagent free chlorine analyzers,

GRUNDFOS MULTI-STAGE BOOSTER PUMPS & HYDRO-MPC BOOSTER PUMP PACKAGES - Grundfos CR vertical multi-stage booster pumps up to 250HP, Hydro-MPC complete variable speed booster pump skid systems, CM end-suction close coupled multistage pumps, NSF 61 certified.

GRUNDFOS DIGITAL SOLUTIONS – Dedicated pump station controllers for both wastewater collections pump stations and clean water booster pump stations, Grundfos Connect cloud-based SCADA systems for remote monitoring and control, Grundfos Machine Health utilizing advanced wireless sensors for predictive maintenance diagnostics, Grundfos GO mobile pump control & data collection, Grundfos CUE variable frequency drives.

GRUNDFOS SUBMERSIBLE WELL PUMPS – Premium line of submersible well pumps available in 304/316 SS, featuring state-of-the-art hydraulic design combined with energy-efficient motors, solar powered packages available for remote well locations. NSF 61 certified.

PACO – Complete premium line of end-suction centrifugal, horizontal & vertical split-case, & inline centrifugal pumps, close-coupled & frame-mounted configurations, NSF 61 certified

YEOMANS-CHICAGO-MORRIS – Heavy-duty large dry-pit solids handling wastewater pumps, offered in various materials of construction & mounting configurations. Severe duty grit pumps featuring cup-type recessed impeller design & Hi-Chrome iron construction.

HIDROSTAL PUMPS – The original Screw Centrifugal pumps for high-efficiency clog-free pumping in high-chrome iron construction for superior abrasion resistance, submersible & immersible pumps for collections systems/lift stations, Influent/headworks pumping stations & in-plant pumping applications, end-suction dry pit/bearing frame pumps, side-by-side or overhead belt driven mounting arrangements, sludge pumping & digester mixing pumps, PREROSTAL®: self-cleaning wet well system.

SUPER BETSY – Diesel driven trailer mounted portable pump packages utilizing the Hidrostral Screw-Centrifugal pump technology for bypass pumping or slurry pumping applications.

BEDFORD PUMPS – Axial flow & mixed flow pumps, vertical turbine pumps, fish friendly pumps

MOYNO™

*REPRESENTED IN NORTHERN CALIFORNIA & NORTHERN NEVADA ONLY

MOYNO – Leading manufacturer of premium progressing cavity pumps available in various configurations, EZstrip™ pump for true “maintenance in place” progressing cavity pumps, polymer application pumps, heavy duty cake pumps, hopper feed pumps in various configurations including anti-bridging systems, In-line grinders & screens, mag drive pumps, sanitary pumps.

*REPRESENTED IN NORTHERN CALIFORNIA & NORTHERN NEVADA ONLY

WEMCO – Model C heavy-duty recessed impeller grit pumps with Ni-Hard wear parts, Wemco Screw-Centrifugal pumps for high efficiency clog-free service in various materials of construction, Wemco Prero self-cleaning wet well system, Wemco Hydrogritter cyclone-classifier systems for grit removal/washing/dewatering, Chop-Flow chopper pumps, self-priming pumps.

SIMFLO

SIMFLO PUMPS – Premium line of Vertical Turbine pumps offered in Open Lineshaft, Enclosed Lineshaft, & Submersible Turbine configurations, NSF 61 certified for potable drinking water applications, various materials of construction available, discharge heads available in cast iron, ductile iron, & custom fabricated configurations.

EngineeredProducts

LIBERTY ENGINEERED PUMPS – Submersible Grinder pumps from 2.5 HP up to 15 HP utilizing the patented V-Slice Cutter Technology, Submersible Non-Clog pumps in single & dual seal configurations, all pumps are available in either non-explosion proof or FM-Explosion proof rated configurations and can be guide rail mounted for easy removal. Buy America Build America (BABA) Compliant.

DANFOSS – Leading manufacturer of Variable Frequency Drives (VFD's) with a full range of VFD's dedicated to the Water & Wastewater market from 0.25 HP – 1500 HP, available in a variety of enclosure types and voltage configurations, drives with built in PLC's for pump control and a variety of communication protocols.

REID LIFTING – Leading manufacturer of lightweight portable lifting systems for materials and people, including the **PORTAGANRTY** movable Gantry crane, the **T Davit**, davit cranes for loads up to 11000lbs. A wide variety of lifting accessories and portable base configurations are available.

PULSAR – Ultrasonic & Radar level measurement & flow monitoring devices, industry best 3-degree beam angle and auto mapping for the most accurate ultrasonic device on the market, compact units, various controllers for a wide array of applications, clamp-on ultrasonic flowmeters including transit time flowmeters for clean fluids & doppler flowmeters for sludge, slurries, grit, & raw sewage applications, open channel & partially filled pipe flowmeters, area-velocity flowmeters, permanently installed or portable versions available for all flowmeter options.

TOPP INDUSTRIES – Fully customizable packaged fiberglass lift stations, offered with attached or detached valve pits, pump stations come pre-plumbed with piping, valves, & fast-out pump guide rail systems per customized design. Additionally offer a complete line of polyethylene, fiberglass, and structural foam wastewater, sump, and sewage basins, lids, & covers.

AERATION INDUSTRIES – Municipal & Industrial fixed and floating non-splashing surface aerators, Triton® series floating aerator/mixer for superior mixing & oxygen transfer, anti-fouling aspirator aerator, aerator rental program for emergency or temporary aeration.

BERMAD – Premier manufacturer of Control Valves for pressure reduction/pressure relief/pressure sustaining, flow control valves, pump & surge control valves, Air Relief valves for clean water applications or sewage & wastewater applications, mechanical or electro-magnetic water meters.

CONTEGRA – Heavy-duty non-metallic submersible pressure transducers for liquid level measurement in either PVC, PVDF, or Viton materials of construction, gauge pressure transducers, ultrasonic level transmitters, 316 SS mechanical float switches, touchscreen pump station controllers for 2, 3, or 4 pump operation.

OR-TEC – Screening & Headworks equipment featuring: Screw Screen Compactor, Rotary Brush & Rake Screens, The Blue Whale Micro Bar Screen w/ screen openings down to 1mm, LO-FLO screen, Constant Current Screen & Grit System, Vortex Grit & Classifier System, Septage Receiving Systems, Wash Compactors, Screw Augers, Sludge Dewatering equipment featuring: Belt Filter Press, Belt Thickeners, and the Rocker® Screw Press.

DISCFLO – Heavy Duty DiscPump technology utilizing a unique laminar-flow, non-impingement design for abrasive, viscus, or air entrained pumping applications. Discflo pumps are available in a variety of configurations and a variety of metallurgies.

PARK PROCESS - Container filters for solids dewatering: self-dumping, front loader & roll-off sizes, booster pump packages, sewer pump station packages, precast concrete products, oil/water separators, rainwater harvest systems, manual bar screening systems

***REPRESENTED IN NORTHERN CALIFORNIA & NORTHERN NEVADA ONLY**

TONKA WATER – Municipal water systems for groundwater, surface water, and wastewater applications including: Aerators & VOC Strippers/Degassifiers, clarification systems, filtration systems, ION exchange, membrane systems, packaged treatment systems, underdrains, media & resin, controls, Simul-Wash, delivered treatment systems, and technical & aftermarket services

Division of McNish Corporation

***REPRESENTED IN NORTHERN CALIFORNIA & NORTHERN NEVADA ONLY**

WALKER PROCESS - Circular & rectangular clarifier mechanisms, clarifier drive units, rotary distributors, RBC's, grit removal, gravity thickeners, digester covers, digester mixing, heat exchangers, boilers, combo boiler/heat exchanger, aerobic digestion, grease & skimming's removal, in-line flash mixing, solids contact clarifiers.
